

FLOKYL

(CONCENTRATED LATEX)

□ **Indications:** Plastified vinyl acetate-based concentrated latex. This is used for preparing absorbent surfaces prior to painting (only for indoors). It can be used as a finish over matt paints when hardness and gloss is desired. It can also be mixed with water-based paints, a maximum of 20 %, to give them greater hardness.

□ **Thinning:** Thinning is carried out using water: 1/3 to 1/4 (Flokyl/water).

□ **Technical characteristics:**

Solids content.....43 ± 1 %
Particle size.....1 to 2 microns
(MTFF) °C4 to 6 °C
Density1.05 g/cc
Coverage8 to 10 m²/litre
Viscosity390 to 450 poise
Gloss 600.....90 %

Storage condition in the container: After storage for 6 months it has no skin, lumps or gels.

□ **Presentation format:** In containers holding 750 ml, - 4 l, - 15 l.

Note: It is important not to apply this primer at temperatures under 5°C.
